## PRODUCT DESCRIPTION

**Designer:** Enzo Catellani

### Catellani & Smith Giulietta LED Floor Lamp

The Giulietta LED floor lamp was designed by Enzo Catellani with the intention of honouring his daughter Giulia. The elegant designs and simple materials echo his love and adoration for his daughter, hence the name Giulietta. The use of nickel adds a luxurious touch to the simplistic silhouette. This sleek modern floor lamp by Catellani & Smith pairs the shimmering nickel with the stark matte black. This genius collaboration of materials gives the floor lamp a stylish chic appearance whilst maintaining its functionality.

The flexible top stem of the lamp allows you to direct the light source in any direction you wish. This results in a lamp that can provide multiple different types of light. Whether that be an indirect ambient light created by angling the light towards a corner of a room or the wall, or it could be a more direct functional light that is used for tasks such as reading. Place this lamp in a functional workspace or study or bring the Giulietta to your living space for a stylish touch. The Catellani & Smith Giulietta floor lamp features a touchless step dimmer that makes adjusting the lumen output as easy as hovering your hand over the sensor on the circular shade. This makes the use of this floor lamp as accessible as possible, making it easy to use and enjoy.
