Panzeri AIDecimo LED Wall Light

The Panzeri AIDecimo LED Wall Light is a recessed, trimless wall lamp crafted for seamless integration into interior spaces. Featuring an innovative click mechanism for opening and closing, this light creates a luminous perimeter frame when closed, adding a unique architectural detail to your walls.

With a high-performance 21W LED module delivering indirect light, allowing for reduced luminous flux and power consumption. Constructed from pickled sheet metal with a durable white polyacrylic paint finish, it also incorporates an opaline polycarbonate diffuser for soft, diffused illumination.

Perfect for creating compositions on wide walls or enhancing the ambience of bedrooms and living areas, the AIDecimo offers both functionality and style. Its versatile design and clean aesthetics make it a favourite among modern lighting solutions.

Please note, this light comes with a recessed housing that must be plastered into the wall.
