PRODUCT DESCRIPTION

Designer: Chris Martin

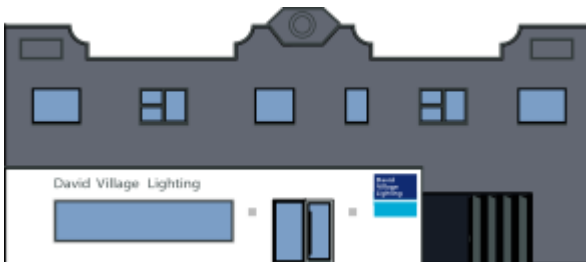

Buster LED Table Lamp by Resident

The Buster Table Lamp was designed by Chris Martin, a British designer who creates functional yet elegant pieces that emulate Scandinavian design. This table light is highly versatile, due to being made from nickel-plated stainless steel with an adjustable joint which allows movability directly where the light is needed. The circular lampshade can move up, down and side to side whilst the stem appears to have a gravity-defining lean thanks to the perfectly engineered ball and socket structure at the base of the lamp.

The Buster Table Lamp makes an excellent light for reading or up-close tasks in an office or workspace. The base also features a soft touch dimmer switch so you can create the right mood in your interior.
