PRODUCT DESCRIPTION

Designer: Alex Fernandez Camps

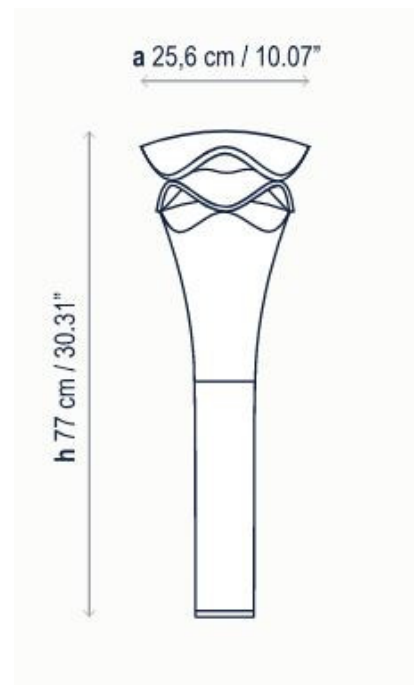

Bover Cornet B/77 LED Bollard

The Bover Cornet B/77 LED Bollard has a personality strongly rooted in nature and purposefully brightens the space it is in, without appearing too dominant. This understated design is the largest in the Cornet family, designed by Alex Fernandez Camps, but still boasts the same curved lines and playful layers that make the lamp stand out. The body is made from polyurethane, a durable material - making this bollard highly weather resistant all year round.

The integrated LED is dispersed through the layers of the lamp head and creates a decorative lighting effect in whichever area you decide to display the B/77. Even when not illuminated, the Bover Cornet B/77 LED Bollard makes a lasting impact in your environment and adds a charming and artistic touch.
