## Tekiò Horizontal LED Pendant Light by Santa \& Cole

Designed by Anthony Dickens, the Tekio Horizontal pendant lamp uses the best of LED technology and ancient materials to bring a truly stylish light. The pendant light is created using a methacrylate diffuser which surrounds the integrated LED which in turn is covered by a shade made of Japanese washi paper. The paper has been around for centuries and is traditionally used to create Japanese lanterns.

Emulating this aesthetic, the Tekio Horizontal pendant light features a tubed silhouette that suspends in mid air in a graceful way. The paper and inner diffuser create a warm illumination which is also dimmable thanks to Dim to Warm technology. This system allows you to dim not only the lumen output but the colour temperature to find the perfect atmosphere for your interior. Available in 3 sizes, you can also match with the Tekio Vertical pendant for a consistent lighting scheme.
