PRODUCT DESCRIPTION

Designer: Progetto CMR - Giacobone & Roj

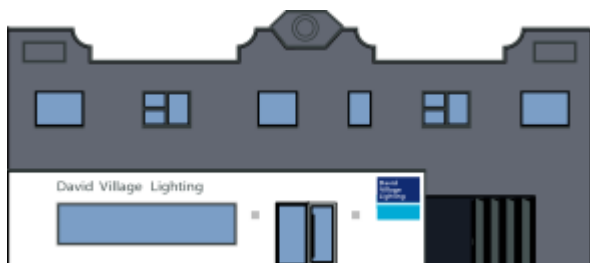

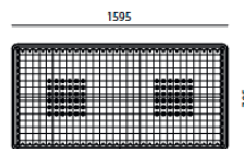

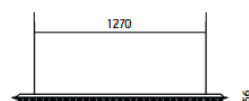

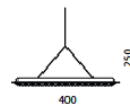

Eggboard Matrix Direct 1600x800 by Artemide

An exemplar design made for office spaces and large open rooms or areas where you need for sound absorbing appliances. This suspension light was designed by Giacobone Roj who is a member of the CMR Project. The Eggboard Matrix has a sinusoidal cross-section on its lower surface as well as a sound-absorbing material. The manufacturer suggests the Eggboard is installed approximately one meter above the speaker, to ensure acoustic efficiency. The Eggboard Matrix Direct 1600x800 is the largest in the range, and the board has a plethora of small, low voltage LED lights along with rotosymmetrical reflectors.

Eggboard is also available in other sizes, colours, dimming options and colour temperatures. Please [contact us](#) for further information.
