PRODUCT DESCRIPTION

Designer: BIG

Gople Suspension by Artemide

A suspension light, stripped to the absolute necessities, the beauty of glass. Gople was designed by Bjarne Ingels Group (BIG) for Artemide; hand processed, based on ancient Venetian techniques. According to that method, white glass will eventually turn into crystal by combining the both upon blowing. Understandably, this technique makes the Gople glass diffuser a unique piece.

Using vacuum metalisation, more finish options became available for the Gople suspension, such as silver, copper. All metallic finishes are made with the outmost respect to the environment using a special vacuum metalisation process.

The entire process to create the Gople lights produces minimal waste, while the end product is highly resistant over time. The glass finish ensures the optimal light emission, protected and screened at the source, and direct emission is maximised through transparency.

Artemide have now made available the [Gople RWB](#), with a patented light technology, producing an ambience optimal for both humans and plants.

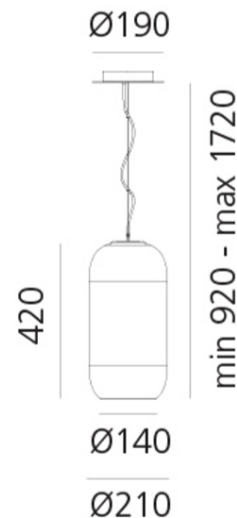

PRODUCT SPECIFICATION

Light Source: 1 x 20W LED E27 dimmable (excluded)

IP Code: 20

Dimming: Dimmable via Push systems.

Dimensions: Ø21 cm
42 cm height
200 cm max cord length
