PRODUCT DESCRIPTION

Ferm Living Braided Disc Pendant Light

The Ferm Living Braided pendant, hand made from a type of reed found in the old world. Being handmade means that each pendant is unique, as there will be variations between them. The pendant emits a natural and warm direct downlight, from the opening at the base of the shade. Small strips of light escape between the braided reed and go towards every direction playing a game of light and shadows.

The pendant can be hung above your dining table or at the corner of any room and become a focal point, but the Braided lamps are ideal for a child's room.

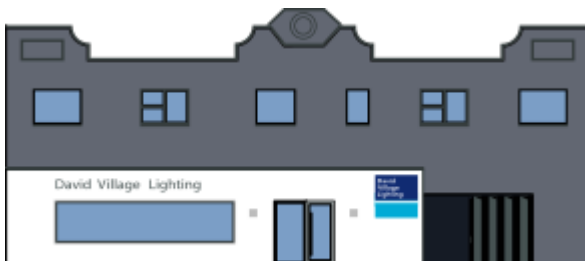

The Braided Disc pendant lamp is equipped with a 2m fabric cable suspension kit but is also available to purchase with a 4m suspension kit or without a kit. Please [contact us](#) for more information and pricing.
