PRODUCT DESCRIPTION

Designer: Ernesto Gismondi

Discovery Vertical App compatible by Artemide

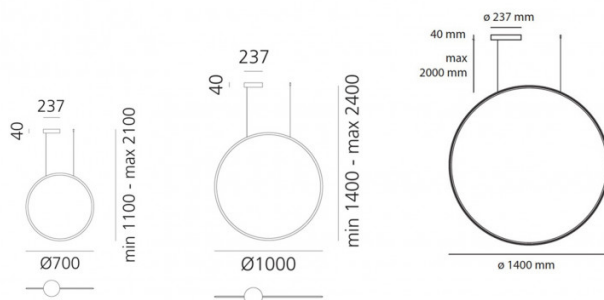

The app compatible version of the Discovery Vertical, a design by Ernesto Gismondi for Artemide. The suspension light is immaterial and unobtrusive, as the slim aluminium rim and transparent PMMA surface make the light almost imperceptible when not switched on. The aluminium rim hosts the LED strips which in turn will illuminate uniformly the surface, filling it with light. The light only becomes apparent when you switch it on, absence is replaced by a perfectly light-emitting surface. This is the app compatible version of the Discovery Vertical light, that you can control using the Artemide App.

This product is Artemide App enabled. The intuitive and user-friendly Artemide App can be used to control individual lights or groups of lights both in your home or in a commercial setting. Simply download the App to your mobile or tablet device and control your Artemide App-enabled light via Bluetooth connection. One feature which the Artemide App allows you to adjust the colour temperature and dimming settings of your Artemide light. Further information about the App and its other features can be found [here](#).
