Kelly Cluster Sphere Trio Light by
Lodes

A part of the [Lodes Kelly collection](#), the Kelly Cluster Sphere light is a smaller version of the [Kelly Sphere pendant](#), made to be able to cluster together in a trio. The lampshade is made from laser cut metal to create an interesting holed design. This aesthetic allows the light to reflect in fun ways and the inner glass diffuser, means the light is glare-free and warm.

Wonderful for both professional and domestic settings, the Kelly Cluster Sphere light is a beautiful way to have a creative light that is clustered in the way you want. Use as a big feature light in the room or have a smaller cluster to create an ambient light, perfect for making a lounge area cosy.

The ceiling canopy is white by default, but the Kelly Cluster can be purchased with a black canopy. For more information and pricing, please [contact us](#).

This light is available to buy online as a cluster of 3 in either a Matte White 9010, Matte Black 9005, Matte Champagne or Coppery Bronze colour. To order or discuss a cluster which uses a combination of the four colours or uses more than 3 individual pendants please [contact us](#).

PRODUCT SPECIFICATION
