PRODUCT DESCRIPTION

Designer: Sergio Prandina

Tiara LED Pendant Light by Prandina

The LED version of the [Tiara pendant light](#), the Tiara LED pendant's design was created by Sergio Prandina in 2012. The integrated LED light source is both energy-saving and long-lasting making this version of the pendant more eco-friendly. The shade has a rounded and smooth design which makes it chic and stylish, and the engraved line that lets a little bit of light escape from near the top of the shade is a beautiful finishing detail.

The Tiara LED pendant light emits a soft glow due to the white painted finish on the inside of the shade and has a downward directed light which makes it perfect for hanging over tables or as a bigger spotlight. This pendant can be used in a variety of settings for both commercial and domestic spaces. Available in 2 sizes and finishes, rest assured you will find the right fit for your space.

The Tiara LED pendant is non-dimmable but a dimmable version is available on request. Please [contact us](#) for more info.
