PRODUCT DESCRIPTION

Bella Pendant by Panzeri

Compact yet stunning, the Bella LED Pendant light is meant to catch the eye. Designed by Enzo Panzeri, the son of Panzeri's founder, the Bella is a play of geometry with a disk shaped diffuser. The pendant comes in five finish options: black, white, bronze, brass or titanium and benefits from an integrated, non-dimmable, LED light source. You may choose between two versions of the Panzeri Bella light: either emitting a **direct-downwards light** or an **indirect-upwards light**. With a 300 cm cable length, you can install the pendant to the desired height; a matching colour circular ceiling canopy comes with the light. A single pendant will look great as a standalone, but you may choose to create linear or cluster of the Bella pendants in different colours and or different light emission types; the end result will be a spectacle of light. Whether for your home or business, in any room and setting as the lights are perfect for both private, commercial and interior spaces in hospitality.

The Bella pendant is also available without a canopy or driver. For more information and pricing, please [contact us](#).

[Bella Collection](#) also includes a table lamp, with a 5-step dimmer, and a wall light with a standard or recessed fitting; both available in the same five colours, so you may mix and match with any of the Bella lights.
