PRODUCT DESCRIPTION

Designer: Hans-Agne Jakobsson

Warm Nordic Fringe Wall Light

The Fringe Wall Light is a chic and vintage lamp that was designed in 1960 by Hans-Agne Jakobsson. Warm Nordic reintroduced the design, retaining all of its original charm and style. This wall lamp is made from brass-plated steel paired with a fringed lampshade. The graceful fringe conceals the light source, creating a soft glow that is warming and comfortable. The wall light also features a switch included on the cable.

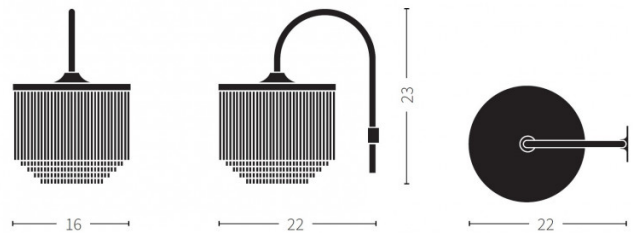

The Fringe Wall Light is available in a cream-white colour finish and can be used in many settings to add a sophisticated and stunning look. The fringe will catch the eye and will work well in both traditional and modern design schemes. Use to add ambient lighting to domestic spaces such as bedrooms and living rooms, or commercial settings such as hotel lobbies or restaurants. [The Fringe Collection](#) can be displayed together to create a consistent lighting scheme throughout your home.

Please note this wall lamp needs to be installed near a socket.
