PRODUCT DESCRIPTION

Unseen LED Pendant System by Petite Friture

The Unseen pendant system is a new 2020 release from Petite Friture in collaboration with Studio Pepe. Wanting to showcase the purity in light, the designers used the aesthetic of neon lighting to produce a pendant system that is characterised by various shapes and curved polycarbonate tubes. Each houses an LED light source and emits a bright band of white light perfect for illuminating a big space.

The Unseen LED pendant lamp system is available in a triple or quintuple configuration, with each tube having a unique perspective. This pendant light system is full of character and will be a artistic and expressive lighting solution in any interior. Use in commercial settings or homes and ideally use in big rooms to have a huge impact on the space.
