PRODUCT DESCRIPTION

Designer: Bill Curry

Stemplite Table Lamp by Gubi

The Stemplite table lamp is a part of the brand new [Stemplite collection](#), a range that has been rediscovered and reissued by owner and creative director Jacob Gubi. Originally designed by Bill Curry in 1962, he wanted to create a lamp that was a self-contained unit, comprising of one piece. With a background in aerospace, Curry was inspired and captured the essence of the space age, creating a table lamp with a rounded silhouette and appealing lampshade.

The Stemplite table light was renowned at the time and because of its innovation even featured on the set of the original Star Trek TV series. Now brought back to the modern era and user, this table light is available in 2 sizes and in 3 chic colours, black chrome, black red and pebble grey, which enhance the original form whilst updating it for a contemporary eye. The glass shade diffuses the light source, creating a warm and soft glow which will fill the room. Use in many settings to bring a vintage touch and iconic design feat to your interior.
