PRODUCT DESCRIPTION

Designer: Ernesto Gismondi

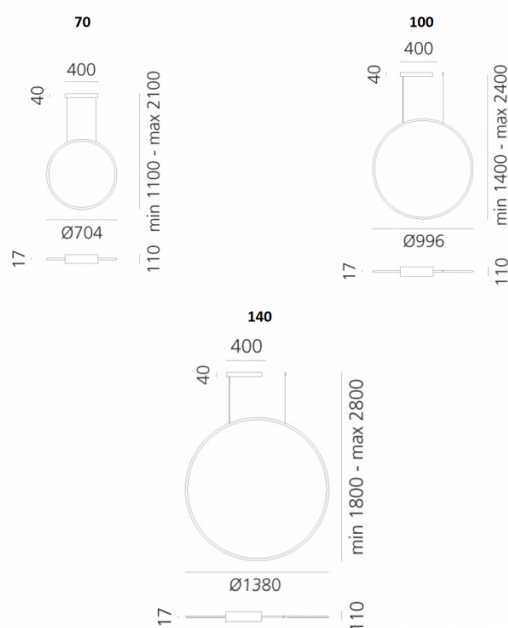

Discovery RGBW App Compatible LED Vertical Suspension by Artemide

A part of the [Artemide Discovery collection](#) by Ernesto Gismondi, the Discover RGBW vertical suspension is made from an aluminium frame with technopolymer that goes unnoticed when switched off and transforms when switched on. The thin veiled effect of the diffuser creates a lightweight effect that draws the eye and creates wonder.

The Discovery RGBW vertical pendant can be controlled using the innovative Artemide app. This light has colour changing ability as you can control the light by mixing red, green, blue and white colour spectrums to create a stable selection. The possibilities are truly endless with this suspension light as you can create a magical light show or atmosphere that is suitable for your setting. Suitable for homes and professional interiors, this pendant lamp comes with a black or satinized aluminium frame and is available in 3 sizes, the 70, the 100 and the 140.
