PRODUCT DESCRIPTION

Designer: Frederik Kurzweg

Normann Copenhagen Superpose Pendant

Designed by Frederik Kurzweg, the Superpose pendant was designed for Normann Copenhagen. Made from three perforated steel sheets, the pendant light has a sculptural and lightweight design that concentrates on geometric shapes, as each layer overlaps the other. Superpose Pendant has been designed to feature in both commercial and residential settings and never looking out of place.

The Superpose pendant lamp provides a downward-directed light as well as an outward glow that is soft and warm. The pendant can be used in a wide variety of settings and particularly thrives when hung over tables. The clever construction means that the Superpose will change form and aesthetic from different angles, giving everyone a different perspective on the shade. This pendant is available in a chic white finish that will suit many design schemes.
