PRODUCT DESCRIPTION

Designer: Panter & Tourron

Tense LED Pendant Light by New Works

A truly innovative and modern lighting solution, the New Works Tense LED Pendant is crafted from 100% recyclable Tyvek which is stretched and shaped into a streamlined diffuser. Panter & Tourron, the Swiss design duo behind Tense, aimed to create a collection of lights based on the idea of tension, hence the name. They experimented with various materials and equipment that would bring their vision to life. Eventually, they discovered Tyvek, a medical fabric that is not only recycled but recyclable again and again.

The airy and lightweight nature of this pendant light makes it appear like a cloud, floating gracefully in mid-air; the Tyvek structure results in a calming and atmospheric glow which is emitted across your room. The elongated shapes of Tense easily fit into a compact box, allowing for straightforward transportation. The Tense pendant lamp is available in 4 sizes, Ø55, Ø70, Ø90 and Ø120, and also has an integrated LED light source that is long-lasting and effective. This pendant is perfect for use as a main light in a room thanks to its illumination and alluring aesthetic and it brings character to spaces such as dining rooms, entryways, hotels, restaurants and bars.
