PRODUCT DESCRIPTION

Designer: Pamio Design

Fabbian Cubetto Double Wall Light

The Fabbian Cubetto Double Wall Light is a geometric lighting solution providing direct and/or indirect light emission. The structure was inspired by the form of an ice cube and designed by Pamio Design Studio, it features two light sources that project both an upwards and a downwards illumination. The result is an ambient glow that washes your walls in light.

The Cubetto Double Wall Light can be displayed individually or in clusters along a wall to create playful lighting patterns. Choose between three minimal finishes of either black, white or transparent crystal glass - all featuring elegant chrome detailing. This wall light is a beautiful addition to kitchens, hallways, dining rooms and staircases. It can also be an excellent way to add accent lighting to commercial settings in the hospitality industry.
