PRODUCT DESCRIPTION

Designer: Alberto Meda & Paolo Rizzatto

Luceplan Fortebraccio Wall Light

The Fortebraccio Wall Light was designed by Paolo Rizzatto and Alberto Meda and is currently a leading product on the market. The main selling point for the Fortebraccio 100 Wall Light is the vast mobility it offers, the lamp boasts central joints on the arm in order to grant fluidity of movement, this makes the Fortebraccio an incredibly functional direct light. A subtle but powerful task light, the Fortebraccio Wall Light is designed to produce an astonishing level of light efficiency. This task light saves energy without affecting functionality.

Whilst the stripped back design of this light is impressive, the most striking feature is the handle. Not only does it give the table lamp a unique element, it is also crafted from ergonomic, polycarbonate, so it is possible to fluidly move the Fortebraccio Wall Light seamlessly without having to touch the light source. The handle also holds the integrated on/off switch. The 100 Wall Light makes a great addition to your kitchen, hallway or even bedroom, emitting a soft white light.

The Fortebraccio Wall Light is available in two sizes
